

9th Annual SciTrek Lecture on Science Education

Guest Speaker: Robert Brewer

“Antiracist Teaching for Science Teachers: Why, What, and How?”

- Tuesday, May 4th, 4:00-5:30 pm
- Zoom: shorturl.at/cASZ1
 - Meeting ID: 867 3304 3110
 - Passcode: 882831

How and why should science teachers promote racial justice? Are we prepared to do this and what is our role? When students and communities are suffering and "bringing" that pain to school this can result in disinterest and a lack of engagement in learning. This lecture will define racial literacy, explain how antiracist teaching and science teaching intersect, and provide model antiracist lessons.

Robert Brewer holds degrees in physics and math from the University of San Francisco. After which he received his teacher credential and Masters in Bilingual and Multicultural Education from Sacramento State University. He has been teaching high school for 22 years and has taught physics, math, and AVID. In addition he works with the teacher education program at Sacramento State.

SciTrek was founded in 2009 at UCSB by Dr. Darby Feldwinn and Dr. Norbert Reich. SciTrek is a science education outreach program that brings inquiry-based science education to 2nd-12th grade students in local schools.
